

Van-Isle Waterproofing+

Crew Checklist Template

We are designing processes for every item below to develop a manual establishing standard operating procedures for trucks, trailers, tools, warehouse inventory, and field readiness. The goal is to document every action in our day so that we can perform our services at the highest quality and use our time wisely.

USE THE BOX TO CHECK OFF THE PURPOSE OF THIS NEW CHECKLIST:

☐ **Warehouse Operations**

- ☐ Opening Procedures
- ☐ Safety Checks
- ☐ Inventory Handling
- ☐ Standards
- ☐ Antyime Tasks
 - ☐ Daily
 - ☐ Weekly
 - ☐ Monthly
- ☐ Tool Inspection
- ☐ Equipment Inspection
- ☐ Vehicle Inspection
- ☐ Fleet Inspection
- ☐ Materials Inspection
- ☐ Repairs & Maintenance
- ☐ Daily Start-Up
 - ☐ Tool selection
 - ☐ Material selection
 - ☐ Vehicle Inspection
 - ☐ Truck loading procedure
- ☐ End-Of-Day Closeout
 - ☐ Equipment Cleaning
 - ☐ Equipment Checks
 - ☐ Material returns
 - ☐ Inventory checks
 - ☐ Vehicle Fuel
 - ☐ Min. tank required to leave for a job
 - ☐ Where to get gas & payment
 - ☐ Mileage Checks
 - ☐ Tool maintenance

☐ **Truck Loadout (start of day) by Service**

- ☐ Truck Prep
- ☐ By Service
 - ☐ Waterproofing
 - ☐ Traffic Coating
 - ☐ Caulking
 - ☐ CFI
 - ☐ XPS

☐ **Truck Closeout (end of day)**

- ☐ Truck Close-Out
- ☐ By Service
 - ☐ Waterproofing
 - ☐ Traffic Coating
 - ☐ Caulking
 - ☐ CFI
 - ☐ XPS

☐ **Service Execution**

- ☐ Waterproofing
- ☐ Traffic Coating
- ☐ Caulking
- ☐ CFI
- ☐ XPS
- ☐

☐ **Site Prep**

- ☐ Hazard Assessments
- ☐ Equipment Staging
- ☐ Materials Staging
- ☐ Crew Planning
- ☐ Down-time activities
- ☐ What-if scenarios
 - ☐ Broken, battery, lost, forgot

☐

Van-Isle Waterproofing+

- ☐ **Daily Job Site Closeout** (what to do before leaving the site & things to bring back like ladders, batteries and tools at the site)

- ☐ **Crew Lead**

- ☐ Scheduling
 - ☐ Daily, weekly & monthly lookahead
- ☐ Site Readiness
- ☐ Site manager touchpoints
- ☐ Materials Ordering
- ☐ Inventory Tracking
- ☐ Warehouse management
- ☐ Downtime Reduction Procedures
- ☐ Add-on opp's (crack injection)
- ☐

- ☐ **Travel & Mobilization**

- ☐ Site Readiness
- ☐ Site Access Procedure
- ☐ GC/Site Super Comms
- ☐ Parking Logistics

- ☐ Site Orientation
- ☐ Site Safety
- ☐ What tools/materials are on site
- ☐ Out-of-town
 - ☐ Mileage (own car)
 - ☐ LOA

- ☐ **Quality Assurance**

- ☐ Start of the job
- ☐ Middle of the job (50% complete)
- ☐ End of job (95% complete)

- ☐ **Demobilization (100% complete)**

- ☐ Site Checks & sign-off
- ☐ What needs to come back to the warehouse (e.g., fence signage, ladders, tools, batteries)

- ☐ **Warranty**

- ☐ Other_____
- ☐ Other_____
- ☐ Other_____

Examples of what to answer in your process:

- Crew Lead – Site Prep:
 - Has the site manager been called and confirmed that there is proper scaffolding/access, they are ready for the crew, and we can fit our truck/boom lift, etc?
 - Do we need to review plans (if so, what are they called) to measure before we go?
 - Do we have enough product? Have you double-checked that the crew has enough?
 - What happens if we run out of something?
 - What happens if the site is not ready?
 - Has our signage been put up on the fence?
- Service Execution:
 - Weather conditions: What is the go/no-go policy for this service? For example, if there's a 30% chance of rain, do we still send the crew?
 - What quality checks are required before, during and after a job?
 - What mistakes can happen with this task? How can this checklist help them avoid those mistakes?
 - What happens if an item is forgotten for a job?
 - How do you know if we're ready to spray?
- Warehouse/Truck:
 - What are some recent hiccups that have occurred on a job site or at the warehouse? What did you do to resolve it?
 - Why are you loading that tool?
 - Is there at least a half tank of gas? If not, where do you get gas, and what's the payment process?
 - What happens if you get a parking ticket?
 - What happens if you get in an accident?
 - What happens if the XYZ tool breaks? What are the 10 things to check to fix it?
- Site wrap-up
 - Has our signage been taken off the fence? What job site do we bring it to next?

Van-Isle Waterproofing+ **Process Form**

DATE: _____

CREATED BY: _____

Select **ONE item** from the checklist and document every action required from the beginning to the end.

What this checklist is for: _____

Who is responsible for this task: _____

1. _____

2. _____

3. _____

4. _____

5. _____

6. _____

7. _____

8. _____

If you require more lines, write on the back of this sheet.

Does this item require a photo or video to help explain the action?

Photos: Y/N

Videos: Y/N

The following are examples of clear processes:

Tool Failure Troubleshooting

Before calling for repair: 1. Check power source. 2. Check breaker. 3. Check extension cord. 4. Check battery charge. 5. Test spare battery. 6. Inspect switches. 7. Inspect plugs. 8. Check for overheating. 9. Review operating instructions. 10. Test with alternate power source.

Downtime Reduction Procedures

When waiting for inspections, cure times or deliveries: • Clean tools. • Organize truck inventory. • Update material counts. • Complete safety inspections. • Prepare next work area. • Perform warehouse improvement tasks.

Warehouse Tasks When Returning Early

■ Inventory counts. ■ Clean trailers. ■ Organize tool storage. ■ Restock consumables. ■ Repair minor equipment. ■ Prepare future project materials. ■ Update maintenance logs. ■ Dispose of waste materials.

Crew Lead Responsibilities

Review schedules weekly. Order materials on Mondays. Verify long-lead materials. Complete truck audits. Assign warehouse tasks. Focus on production planning rather than supplier pickups whenever possible.

Truck Readiness Scorecard

Cleanliness 20 points Organization 20 points Safety Equipment 20 points Tool Readiness 20 points Inventory Accuracy 20 points Target Score: 95+ Deductions: Missing Tool -10 Missing PPE -10 Low Fuel -10 Dirty Truck -10 Unreported Damage -20

Daily Truck Start-Up Inspection

Vehicle: lights, mirrors, windshield, tires, trailer connection, safety chains, backup alarm. Fuel: minimum 3/4 tank. Safety: first aid kit, fire extinguisher, emergency triangles, PPE. Documentation: registration, insurance, driver's licence. Job Readiness: review address, scope, crew, materials and equipment.

Daily End-of-Day Closeout

Account for all tools. Clean equipment. Remove garbage. Secure materials. Report shortages, damaged equipment and maintenance issues. Recharge batteries and prepare next-day requirements.

Weekly Fleet Inspection

Check engine oil, coolant, brake fluid, battery terminals, tire pressure and tread wear. Inspect trailer brakes and lighting. Record fuel purchases and mileage. Investigate abnormal fuel consumption.

Monthly Fleet Inspection

Review service intervals, oil changes, tire rotation, suspension components, electrical systems, backup cameras and safety equipment.

Warehouse Standards

Every item must have a designated storage location. No tool may be returned dirty. Damaged tools must be tagged and reported immediately. Minimum inventory levels must be maintained for all consumables.

Below-Grade Waterproofing Truck Loadout

Materials: ■ Membrane ■ Primer ■ Sealant ■ Reinforcing fabric ■ Drain board ■ Protection board ■ Filter fabric ■ Hydraulic cement ■ Backer rod Tools: ■ Grinders ■ Rotary hammer ■ Chipping hammer ■ Diamond wheels ■ Rollers ■ Brushes ■ Squeegees ■ Trowels ■ Spray equipment ■ Shovels and excavation tools
