

Van Isle Water Proofing+ — Input & Decisions

(Revised)

Thanks for the V2 doc and the bonus program — that resolved a lot. This revised version confirms what's now locked, notes what I'm building from your V2, and lists the few new things that came up. You can answer right in this doc (space under each item).

Last updated: Aug 1, 2026

Priorities: ● = unblocks real data · ● = fills in the People/Crew tool · ● = quick confirm · ○ = heads-up

✓ Resolved from your V2 (no action needed)

- **Inventory units** → only Unit, Roll, Drum, Box, Sausage · **categories** correct · **daily log** stays central
- **Base points = 5** · **no weekly cap** · point table confirmed (perfect day +25, streak +25, SOP +20, 5★ review +200, small actions +5)
- **Rewards:** \$0.25/point, Cash / Gift Card / PTO, quarter-end redemption (Oct 31 / Jan 31 / Apr 30 / Jul 31), points roll over
- **Google reviews:** link received; starting credits — **Jon & Jordan Thorpe 400 each, Jesse 200**
- **Values direction:** your 3 values (Clear · Helpful · Professional) with a Monday-meeting value-share
- **Bonus program:** received (% of gross wages by review score)

🔧 What I'm now building from your V2

- Lock the material unit list to the 5 options; **price-increase flag** so the Crew Lead is alerted when a product gets more expensive
- Certifications: fields for course date, expiry, **certificate #**, and **photo upload**, with **+5 points per cert detail** completed; your real roster loaded
- Values switched to Clear / Helpful / Professional + the **Monday 6:30am** value-share reminder
- Google starting credits updated (Jon & Thorpe 400, Jesse 200)
- Bonus reworked to your real model (% of gross wages by average score, eligibility gates, ~Dec 25 payout)

Still needed / new questions

- 1. Unit mapping for the existing catalogue

The 121 items we already loaded use lots of units (pail, tube, panel, litre, gallon, board, etc.), but you've now set the only options to **Unit, Roll, Drum, Box, Sausage**. When you fill units by Aug 5, please make sure **every item maps to one of those 5**. Two quick confirms:

- Is **Drum** the unit that should allow **quarter amounts (.25 / .5 / .75)**? (That was previously barrels/gallons.)
- Anything that was a "pail/tube/panel/etc." — which of the 5 should it become? (Or you'll set each directly in the sheet.)

Your input:

● 2. Inventory quantities & costs

On track for **Aug 5** (on-hand quantities + unit costs, with the price column). Just confirm that timing still holds.

Your input:

● 3. Bonus — two things needed to make it real

Your model is clear (Meets 3 → up to 2% · Exceeds 4 → up to 4% · Exceptional 5 → up to 6% of gross wages). To wire it up:

- **Gross annual wages per employee** — needed to show real bonus dollars. Happy to make this **admin/CFO-only** (hidden from crew). Send when ready, or confirm you'd rather enter these privately in the app.
- **Score scale reconciliation:** your bonus uses a **1–5 average score**, but we set crew reviews to **3-tier (Below/Meets/Exceeds)**. Confirm the **annual bonus review uses the 1–5 scorecard for everyone (crew included)**, with the lightweight quarterly check-ins staying 3-tier? (That's my assumption.)

Your input:

● 4. KPI targets per role

On track for **Aug 15**. Confirm timing.

Your input:

● 5. Company values — confirm the switch

Replacing the earlier 5 with your **3** (Clear · Helpful · Professional). Two confirms:

- The main ritual is the **weekly Monday 6:30am crew-meeting value-share** (+5). Keep it to just that weekly one, or also keep a light **daily** value prompt?
- Are the short descriptions from your Values page final, or want to tweak the wording?

Your input:

6. Certifications — confirm roster gaps

Loading your real roster (Jesse, Shane, Jon, Josh, Logan, Thorpe, Rogers). Course/expiry dates, cert #, and photos get entered in-app by each person (+5 each). One confirm:

- **Logan** currently has **no certs listed** — is that correct (none on file yet), or to be added?

Your input:

7. QuickBooks live connection

Ready after the sheets are 100% complete — noted. No action now.

Your input:

Everything else is tracked. The  items are the ones that unlock go-live; the  items fill in Crew+. Send what you have whenever it's ready — I'll keep building against the confirmed pieces.
