

Van Isle Water Proofing+ — Input & Decisions We Need From You

A single checklist of everything we're waiting on from you, so nothing slips through the chat. No rush — work through it whenever suits. You can answer right in this doc (there's a space under each item),

Last updated: July 2026

How to read the priorities: ● = needed to make the tools show your real data · ● = fills in the People/Crew tool · ● = a decision to confirm · ● = just a heads-up / ready when you are

A. Inventory & warehouse data (Warehouse Wizard)

● A1. Finish the inventory spreadsheet — three columns matter most

We've loaded your 121 real items, but many are missing key fields. To prioritize, please fill these in the sheet:

- **Unit (locked)** — Unit, Roll, Drum, Box, Sausage → These should be the only options
- **On Hand (current quantity)** — This will be updated by August 5
- **Unit Cost (\$)** — This will be updated by August 5 and added to column I. In the app, we want to see if products have gotten more expensive and flag that so the Crew Lead knows to find cheaper options or be mindful of order quantities.

● A2. Inventory categories — optional cleanup

These are correct

The sheet is important to include in the live version as it is why we created the app. The crew needed strict quantities and product names to properly log what they were using at sites by the end of each day.

We will add the remaining quantities for this month by August 5.

Once this is live, the crew has to use this tool to log their daily materials/inventory usage:

<https://docs.google.com/spreadsheets/d/1EKxNsSK7GyZ3OYhTupU9XLWnv9tgi79SoyFF-jE0Ck0/edit?gid=1106532455#gid=1106532455>

I will need a nudge to add in any missing inputs between August 5 and when the team starts using it so we don't miss any logs.

FYI - I need to be able to export a spreadsheet or show a clear usage list of the DAILY INVENTORY LOG at the end of each month for our accounting team to track.

B. People, performance & compliance (Crew+)

● B1. KPI targets per role

We've built the KPI framework per role (Crew Lead, Technician, Senior Tech, Ops/Marketing/Accounting, CFO) but left the actual **target numbers blank**. Please provide your real targets so they go live.

Your input:

This will be ready by August 15 at the latest

● B2. Bonus program

See PDF

● B3. Certification expiry dates

Each person needs to add the course date (when they last took it) and expiry date on the app. Add a field where they can add their certificate # and upload a picture of the hard copy certificate.

They get 5 points for each certification detail they complete

B4. Company values — keep or reword?

The goal is to encourage them to showcase how they are acting on our values. We'd like them to get a reminder to share how they used a company value at our weekly crew meeting on Monday morning at 6:30 am

Our Values

Clear

Open, straightforward communication.

Helpful

We go out of our way to solve problems and make your project easier to manage.

Professional

Reliable, safety-first work delivered to a consistently high standard, every time.

● B5. Rewards catalog & point value — one decision needed

- Keep **\$0.25/point** and re-price the rewards catalog upward

Rewards can be used at the **end** of every quarter. If they don't collect their points, they will continue to accumulate.

October 31, January 31, April 30, July 31

Rewards should be: Cash, Gift Card, PTO

● B6. Confirm the points-earning table

Please confirm the full list of point values is **final** (or flag changes) —

- Perfect truck-task day +25
- 5-day streak +25
- Approved SOP +20
- 5★ Google review +200
- Daily/weekly/monthly rituals, safety milestones, peer recognition, etc. + 5

● B7. Google review QR codes

Your notes mention a per-person **Google review QR code** crew can show customers to earn points (+200 for a 5★ review naming them). Confirm you want this in Crew+ and we'll wire it up.

Google review link:

https://www.google.com/maps/place//data=!4m3!3m2!1s0x548f6b3774eb6afd:0xbd3374f825d460ba!12e1?source=g.page.m._&laa=merchant-review-solicitation

Starting #'s:

- Jon & Jordan Thorpe - 400 points each (they got another review that mentioned them on July 30)
- Jesse - 200 points

C. Ready when you are (no action needed yet — just flagging)

● C1. QuickBooks live connection

You've already granted admin access — thank you. When we reach the go-live step, we'll need an admin available for ~5 minutes to authorize the connection. We'll only pull **customer name + job name** for "In Progress" jobs. Just let us know a good time when we're ready.

Ready after all spreadsheets are 100% Complete

For reference — things you've already decided (no action needed)

So you know these are locked in and don't need revisiting:

-  **Platform:** responsive web app (not app-store apps)
-  **Roles:** Admin / Manager / Crew — permissions confirmed correct
-  **Branding:** using your Van Isle brand guide (colors + fonts)
-  **QuickBooks Online,** Projects, pull In-Progress jobs, customer + job name only
-  **SOP tool:** +20 per approved SOP · anyone can create/earn · offline photo/video capture · published SOPs are editable (not tick-off) · anyone can edit · one-person sign-off
-  **Review scale:** 3-tier (Below / Meets / Exceeds) for crew, optional 1–5 for office roles
