

Will get back to you soon:

Tara's account — she has one login (ops@vanislecoatings.com), and it's set to full admin — there isn't a separate "ops" account. So she already has admin access on the account she's using. → **What account should I use to test to see what the crew sees?**

The six quick-reference guides —

Warehouse Wizard: <https://claude.ai/code/artifact/2022b825-1d55-415d-89cb-d97c5be6c103>

SOP+: <https://claude.ai/code/artifact/f7936ee4-334e-48d6-9ae0-f62d999cea35>

Hire dates on file for the team - **Added**

How points get handled for someone who quits mid-quarter - **Pay-out if they leave on their own. Do not pay out if they are fired.**

TESTING: We will test the live site and provide input and feedback this week.

CREW USE: We want the tool to be live and ready for the team to log in and use by September 14. This is the day the crew will input their data and test all tools.

These will be input directly into the tool the week of Sept 14:

- Mileage and last-service fields for trucks
- Tools
- Crew personal data & certifications
- Inventory logs for September

Warehouse Wizard

A. Inventory & warehouse data (Warehouse Wizard)

Developer Feedback

- Ready now – Crew, Inventory at warehouse, Tremco (use inventory at warehouse numbers, but the details from the additional CFO spreadsheet)

<https://docs.google.com/spreadsheets/d/1EKxNsSK7GyZ3OYhTupU9XLWnv9tgj79SoyFF-jE0Ck0/edit?gid=1027071879#gid=1027071879>

Developer Requests

[Inventory at the warehouse](#) will be fully up to date as of Sept 4. **The TREMCO quantities are correct on this sheet, not on the one below.** The sheet below is an explainer from our CFO on what he needs to see on his monthly reports.

We need to continue to be able to track what's been used on this sheet, but...

TREMCO

We need an area to track Tremco-only items. These are our highest-value items and the ones that we can directly bill back to projects. The inputs here go into the balance sheet and are essential for financial tracking specifically for Tremco items.

Should we separate the Tremco items out so that we can export only that data for the CFO?

<https://docs.google.com/spreadsheets/d/1obxwdf-RfFFPK6rXHLilyerjSR4rnCM7/edit?usp=sharing&ouid=102071725214584200511&rtpof=true&sd=true> → Use Tremco ON-HAND quantities from the "Inventory at Warehouse" tab, not the sheet. Incorporate these sections and coding into the app in a NEW section called Tremco.

The following are explainers from our financial team and notes that are relevant on what should be revised and reflected on our inventory count list:

5 fixes to the warehouse sheet → Make these changes to the live sheet. The ON-HAND details will be correct as of Sept 4, but the details below need to be reflected in the Tremco sheet:

- TREMproof 260 is a **52 gallon** drum. The sheet says 55, and every Tremco invoice bills 52.

- PUMA Primer is a 6 gallon pail at **\$765.00**. The sheet has it at 2 gallons and \$196.60.
- PUMA Initiator is a 25 lb pail at **\$1,183.00**. The sheet has it at 10 lb and \$354.41.
- Dymonic 100 Black is on the sheet twice, at \$8.67 and at \$10.05. Delete the duplicate.
- Dymonic FC Limestone is not on the sheet at all.

7 unit costs were understated on the sheet, so the value of what you have been counting has been running low. The attached list is on rates taken straight off the invoices.

Amphibia and BG Grip Tape: both show zero on hand against **\$90,605** bought on June 30. Has this been counted?

Cascade pricing, FYI: Cascade charges **\$16.11** for the same Dymonic 100 sausage Tremco bills at **\$9.09**. Same product, same pack, same quarter. Cascade is only 8% of what we buy from Tremco so it is not a big number today.

We count on the last day of the month in the unit the item is billed in, and record the usage against the project.

The count sheet: the spreadsheet Jordan uses, with the SKU and the quantity on hand in the warehouse on the last day of the month. The unit has to match how the item is purchased on the invoice, so if it is billed in drums, count drums, not pails. Send it to me and I true the QBO inventory balance up to your count.

Usage during the month: when a tracked item goes out to a job, record the quantity used against that project. That is the piece that moves the cost off the balance sheet and onto the job. Anything not on the tracked list keeps working the way it does today, you put the project on the invoice and it gets expensed straight to that project.

The tracked list: I am pulling the SKUs you order from Tremco and cross referencing them to the Cascade description for the same item, so D100, TP260, drain mat and the traffic coating products do not end up as 2 separate items in QBO. I will send you that list and set it up in Dext and QBO on our end.

The reason this matters is July. The Tremco invoice carried a large amount of product that was not being tracked, so it all hit cost of sales in 1 month instead of sitting in inventory until it was used. That is why the July margin looks wrong. Once these 3 pieces are running, project costing and margins hold up month to month.
