

TESTING: We will test the live site and provide input and feedback this week.

CREW USE: We want the tool to be live and ready for the team to log in and use by September 14. This is the day the crew will input their data and test all tools.

These will be input directly into the tool the week of Sept 14:

- Mileage and last-service fields for trucks
- Tools
- Crew personal data & certifications
- Inventory logs for August & September

Questions:

- How much will these tools cost to run on a monthly basis?
- How do we reach out to do you to do revisions/tweaks to the sites?

Daily Inventory Log is now its own destination too – no longer buried as a button inside the general inventory screen. Same switcher gets you there. Date is required on every entry, as requested.

The 5-item sheet corrections (TREMproof 260, PUMA Primer, PUMA Initiator, Dymonic 100 Black duplicate, missing Dymonic FC Limestone) – still queued, waiting on the warehouse sheet to be finalized on your end (you mentioned Sept 12).

Historical inventory logs (July–Sept) + the 5-points-per-item crew awards – also waiting on Sept 12, per your note. I'll bring in the full history with date and project name attached, as you asked.

Josh and Logan's points → crew pool – checked, and there's currently nothing to move (no real points have been earned by anyone yet since the tool hasn't gone live for daily use). Their situation will be handled correctly as part of the Sept 12 import – any points that would land on them from the historical log gets routed into the shared crew pool instead of their own accounts, so nothing falls through the cracks.

A. Inventory & warehouse data (Warehouse Wizard)

Developer Feedback

We are hoping to replace BuilderTrend with a blend of Google Drive (links to files) and the 3 tools you're developing + <https://supercrew.com/> (for time tracking and scheduling, tasks)

- **Warehouse Wizard: Inventory, Tremco, Daily Inventory Logs, Trucks**
 - NEW: Daily Logs (notes about the job) with Daily Inventory Logs (pull exact quantities used)
 - NEW: Job Details (links to resources about the job)
- **Crew+: Internal crew details**
- **SOP+: Systems & Processes**

Developer Requests

Job Details

Is it possible to have an area where all active jobs live and we create folders and upload PDF's and photos there so the crew can see site plans? Or, for something even easier, we can share links to a google drive folder for the jobs where the files live.

Documents

Plans now have a dedicated workspace

Bring plan sets, markups, and critical project details together in Plans and Specs, making it easier to keep teams aligned and work from the latest information.

Daily Log → Incorporate the Daily Inventory Log and turn it into a daily log to share the job details they did that day

Can you replicate this tool in BuilderTrend? We would like to stop using BuilderTrend, and the only thing keeping us from doing that is having a daily log where the crew shares the details in the photo. This takes the daily inventory log and adds detail.

Step 1: Selet Date*

Step 2: Pick Job*

Step 3: Service Type*

Step 4: Complete Daily Inventory Log*

The same system that is currently developed, but this new format will include all of the job notes + details and the tracking of specific items & quantities

Step 5: Complete type fields (see sample below)*

- Materials Installed
- Work Completed*
- Challenges
- To do next time*

Step 6: Add photos (not required as SuperCrew has this) <https://supercrew.com/pricing>

Step 7: Weather Conditions (not required as SuperCrew has this) <https://supercrew.com/pricing>

Step 8: Confirm person completing the log (drop down of team members names & job title)

*all items with asterisk are required fields

Notes:

- Here is an example of how the crew uses the daily logs currently. The reason why we had you design the Daily Inventory Log is because the text format of collecting this data did not automatically update our inventory quantity. We would like to be able to move away from BuilderTrend and have the crew track their daily logs (notes on the job) and inventory (select exact items used and quantities) directly from warehouse wizard
https://drive.google.com/file/d/1X1jb0gfvEr8ghUT9qa_jxn-EjhYkxkbF/view?usp=sharing
- Give 5 points per entry by that team member. If that team member leaves, their points go into a crew bank of points.
- We need to be able to export these reports.
- If possible, we would like you to add historical daily logs for September up until they start using the tool so the crew can see what these will look like in the tool.
